

Transformation through collaboration

The Health Innovation Exchange will support Liverpool City Region businesses through:

Support from our partners

The greatest asset available to the Health Innovation Exchange is the quality of delivery partners.

By working with some of the best minds in health, care and business we are able to concentrate their expertise and resources in support which helps take IDEAS to INVOICE, whilst ensuring industry relevance and excellence, as well as the rigor needed for long-term growth.

Get in touch

If you think you have the specialism, ambition and growth potential to be part of the Health Innovation Exchange, get in touch with us today.

Bringing together world-class expertise to transform Liverpool City Region businesses in the health and care sectors.

We have four key values:

- Collaboration
- Innovation
- Excellence
- Ambition

Part of the Local Growth Hub.

Growing the health economy together

The Health Innovation Exchange is a collaborative programme designed to connect Liverpool City Region businesses with world-class health, care, technology and commercial resources to accelerate innovation and growth within the sector.

Part-funded by the European Regional Development Fund, the Health Innovation Exchange is uniting regional expertise to support ambitious businesses develop and market innovative products and services, nationally and globally.

By exploring the challenges and opportunities of the health and care sectors, the Health Innovation Exchange aims to de-risk innovation and create a centre of excellence within the Liverpool City Region.

Who is it for?

We offer support and development to innovative Liverpool City Region businesses capable of moving into or growing within the health and care sectors with new or existing services, products or processes.

We're here to break down boundaries, opening both minds and markets.

Whatever you do at the moment, if you're a Liverpool City Region business with the skills and ambition to push your approach to innovation in this sector, we'd like to hear from you.

Our goals

The Health Innovation Exchange has three clear objectives:

- 1 Support business growth**
by helping organisations exploit emerging opportunities in health and care.
- 2 Accelerate the development**
of health and care services and products, bringing new smart products to market, and repurposing existing ones.
- 3 Stimulate the creation**
of jobs in supported businesses.

How it works

Health Innovation Exchange activity is driven by two clear areas of focus, Innovation and Commercialisation.

Innovation

By providing businesses with tailored resources for invention, co-creation and real-world testing we'll be able to connect them to world-class thinking and facilities.

Commercialisation

We will provide the specialised business support necessary to ensure the businesses we work with – and their services/products – succeed commercially. Support will range from delivering highly focused health and care expertise, through to much broader managerial support.

Collectively the Health Innovation Exchange will...

80

Deliver fully subsidised support to 80 SMEs in the Liverpool City Region

50

Facilitate collaborations between 50 businesses, partners and research institutions

35

Create 35 new jobs in supported businesses

15

Support the development of new-to-market products in 15 supported businesses

14

Support the introduction of new-to-firm products in 14 supported businesses

6

Accelerate the creation of 6 new Liverpool City Region businesses
